

SRI HARSHINI

Data Engineer | Hadoop | Snowflake | Azure | AWS | SQL | Python

Chicago, IL | sriharshiniraok@gmail.com | +1 (331) 701-1913

PROFESSIONAL SUMMARY

Data Engineer with 3.5+ years of experience in data engineering, ETL development, SQL programming, data validation, reporting datasets, technical support operations, and cloud-based data workflows. Hands-on experience with SQL, Python, PySpark, Azure Data Factory, Azure Databricks, AWS S3, Snowflake, relational databases, data warehousing concepts, and data quality processes.

Experienced in building and supporting data ingestion pipelines, preparing structured datasets, developing SQL queries, creating staging and reporting tables, performing source-to-target validation, and troubleshooting data issues across enterprise and university technology environments. Strong academic foundation in Computer Science with practical experience in database systems, software engineering, cloud data engineering, analytical reporting, and technical support.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, AWS, Azure Data Lake Storage Gen2, Azure Blob Storage, Azure SQL Database, Azure Synapse Analytics Concepts, AWS S3, AWS Glue Concepts, Amazon Redshift Concepts, CloudWatch Concepts

Data Engineering: ETL, ELT, Data Ingestion, Data Transformation, Data Cleansing, Data Validation, Data Reconciliation, Batch Processing, Incremental Loads, Source-to-Target Mapping, Staging Tables, Reporting Tables, Pipeline Monitoring

Databases: SQL Server, MySQL, PostgreSQL, Oracle Concepts, Snowflake Concepts, Azure SQL Database, Relational Databases, NoSQL Concepts

Programming: SQL, T-SQL, Python, PySpark, Java, Shell Scripting, Bash, PowerShell, JSON, XML, REST APIs

Big Data and Storage: Apache Spark, PySpark, Spark SQL, Hadoop Concepts, Hive Concepts, Delta Lake Concepts, Parquet, CSV, JSON, Data Lakes, Data Warehouses, Data Marts

Tools and Reporting: Azure Data Factory, Azure Databricks, SSIS Concepts, Apache Airflow Concepts, Power BI, Tableau Concepts, Excel, Git, GitHub, Jira, ServiceNow, Visual Studio Code, SSMS, Postman, Windows, Linux Basics

Data Modeling and Governance: Star Schema, Snowflake Schema, Fact Tables, Dimension Tables, SCD Type 1/2 Concepts, Data Quality Rules, Audit Logging, Metadata Management, RBAC, Access Control, Documentation

PROFESSIONAL EXPERIENCE

Tuve Group

Telangana, India

Junior Data Engineer

Jun 2021 – Dec 2023

- Supported data ingestion, ETL development, SQL scripting, database reporting, data validation, and data transformation activities for business applications.
- Developed SQL queries, joins, views, stored procedures, and reusable scripts to support reporting, analytics, data extraction, and operational data requirements.
- Assisted in building ETL workflows to extract data from source systems, apply transformation logic, and load clean datasets into staging, reporting, and analytical tables.
- Worked with structured and semi-structured data from relational databases, flat files, Excel files, CSV files, JSON files, and application exports for integration and reporting needs.
- Performed data cleansing activities including duplicate removal, null handling, field standardization, data type conversion, format correction, and business rule validation.
- Supported source-to-target mapping by analyzing source fields, target table structures, transformation rules, lookup logic, and validation requirements.
- Created and maintained staging tables, reporting tables, lookup tables, temporary tables, and intermediate datasets for downstream reporting and business analysis.
- Developed Python scripts for file handling, data formatting, basic automation, validation checks, and repetitive data preparation activities.
- Assisted in ETL testing by validating record counts, checking source-to-target accuracy, identifying data mismatches, and documenting data quality issues.
- Performed reconciliation between source systems and target databases using SQL queries, aggregate checks, duplicate checks, and exception reports.
- Supported database development activities including creating views, writing stored procedures, reviewing table relationships, and optimizing SQL queries.
- Worked with senior data engineers to troubleshoot ETL job failures, SQL errors, performance issues, file load failures, and data mismatch problems.
- Participated in requirement discussions with application teams, QA teams, and business users to understand data needs and reporting expectations.
- Prepared technical documentation for ETL workflows, SQL scripts, source-to-target mappings, data validation rules, and

issue resolution steps.

- Used Git for version control and supported Agile delivery activities including sprint tasks, defect tracking, testing support, and production issue resolution.

Environment: SQL Server, MySQL, PostgreSQL, SQL, T-SQL, Python, ETL, Data Warehousing Concepts, Stored Procedures, Views, Staging Tables, Reporting Tables, Excel, CSV, JSON, Git, Jira, Windows, Linux Basics, Agile

Lewis University

Romeoville, IL

Technical Support Intern / Student Technical Assistant

Jul 2024 – Jun 2025

- Worked as a part-time Technical Support Intern while pursuing Master of Science in Computer Science, supporting university technology operations, data support tasks, and internal system troubleshooting.
- Assisted students, faculty, and staff with technical issues related to university applications, computer systems, user accounts, software tools, and access requests.
- Supported user account management activities including password resets, access troubleshooting, permission verification, and system login assistance.
- Developed SQL queries to retrieve, validate, and analyze operational data from university systems for reporting, audits, and departmental requests.
- Prepared structured datasets from Excel files, CSV files, database tables, and system exports for administrative reporting and operational analysis.
- Validated student, course, faculty, and departmental records by identifying missing values, duplicate records, incorrect formats, and inconsistent data.
- Created data validation checks using SQL and Excel to improve accuracy of reporting datasets and reduce manual review effort.
- Automated recurring data preparation and reporting support tasks using SQL, Python, and Excel-based workflows.
- Supported database-related activities including querying tables, reviewing field definitions, checking data relationships, and documenting data handling steps.
- Helped prepare reports and data extracts for academic operations, enrollment tracking, student services, administrative reporting, and departmental monitoring.
- Worked with university IT staff to troubleshoot technical issues, validate system records, resolve data discrepancies, and improve support documentation.
- Documented troubleshooting procedures, technical support guides, standard operating procedures, data handling processes, and recurring issue resolution steps.

Environment: SQL, Python, Excel, CSV, Database Systems, Reporting Data, Windows, Helpdesk Tools, University Systems, Data Validation, Data Cleaning, Documentation, Technical Support, User Access Support

PROJECT EXPERIENCE

Cloud Data Lakehouse Pipeline

- Designed a cloud-based data lakehouse workflow using Azure Data Factory, Azure Databricks, PySpark, and Delta Lake concepts.
- Implemented bronze, silver, and gold layer design to organize raw, cleansed, and analytics-ready datasets.
- Developed PySpark transformation logic to clean, transform, join, and aggregate datasets for reporting use cases.
- Added data quality checks for duplicate records, null values, schema mismatches, and source-to-target validation.
- Created curated datasets to support Power BI dashboarding and analytical reporting requirements.

Sales and Customer Analytics Data Mart

- Built dimensional data models using fact and dimension tables to support customer, sales, and product analytics.
- Designed star schema structures with customer dimension, product dimension, date dimension, and sales fact tables.
- Developed SQL queries, views, and aggregation logic to support KPI reporting and business analysis.
- Performed data validation and reconciliation checks to confirm accuracy between source data and reporting tables.

EDUCATION

Lewis University

Romeoville, IL

Master's of Science in Computer Science

Jan 2024 – Dec 2025

Relevant Coursework: Database Systems, Software Engineering, Software Design and Architecture

Vignan's Institute of Management and Technology for Women

Telangana, India

Bachelor of Technology in Information Technology

Aug 2019 – Jul 2023

Relevant Coursework: Java, Operating Systems, Database Management Systems, Software Engineering

CERTIFICATIONS

Microsoft Azure Data Engineer Associate – In Progress / Planned | AWS Cloud Practitioner – In Progress / Planned | Databricks Lakehouse Fundamentals – In Progress / Planned
